

Core Plugging Machine

CD-R10

Description:

The heavy-duty diamond-tooled drill press is specially designed to drill cores of various sizes, particularly 1" and 1.5" in diameter, with a maximum height of 3.5" as per the customer's request. The current equipment consists of a 2 hp motor, a floor-standing drill press, a rotary union, a water cooling circulation system (oil and other coolants are available upon request), and a coolant recovery pan. The union allows for connecting the coring bit to the drill press and supplying coolant to the coring bit.

Technical Specification:

- Nominal diameter of coring bit: 1 inch, 1.5"
- Maximum coring depth: 3.5"
- Compatible coolant: Water and oil (upon request)
- Two reservoirs for fresh coolant fluid and waste coolant
- Drill speed: 160-1400 rpm
- Motor power: 2 hp
